## Presentation for TAQA

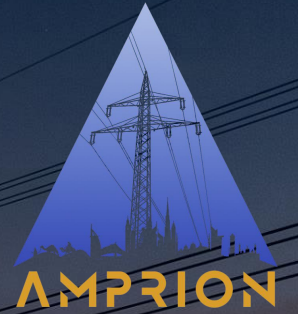

Pre- Qualification  
Date – 22.04.2026

# About Amprion

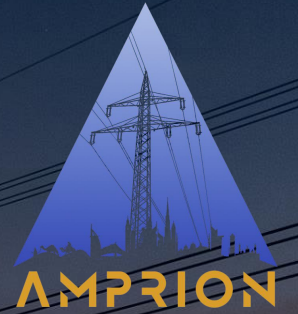

We are a Dynamic and Aspiring Electrical Team handling multiple projects all over UAE. Established in 2024 focusing on Power and Infrastructure projects. Currently Undergoing projects in Abudhabi , Dubai and Sharjah region. We are 30+ Employees with a Strong Leadership Team which focuses on Timely completion of Projects without compromising HSE & Safety. Our vision is to become the leading company in the electrical contracting industry by creating a workplace that not only excels in technical expertise and service quality but also prioritizes the well-being and development of our employees and their families.

# Our Vision

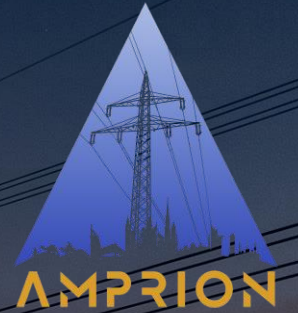

Our vision is to become the leading company in the electrical contracting industry by creating a workplace that not only excels in technical expertise and service quality but also prioritizes the well-being and development of our employees and their families. We are committed to fostering a culture of continuous growth, offering comprehensive training programs, providing strong mentorship, and encouraging open, transparent communication at all levels. Through these efforts, we aim to empower our team members, build lasting careers, and contribute positively to the communities we serve.

# Our Mission

At Amprion, we understand the critical role that reliable infrastructure plays in modern development. Our comprehensive approach enables us to meet the diverse needs of our clients across various sectors, providing innovative solutions that enhance efficiency and sustainability.

# Our Services

## OVERHEAD LINE WORKS UP TO 400Kv

Installation, maintenance, and repair of electrical power lines and supporting structures that transmit electricity above ground over long distances.

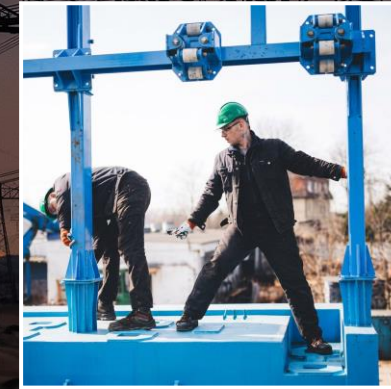

## MEP WORKS

MEP works encompass the design, installation, and maintenance of mechanical, electrical, and plumbing systems that are essential for the efficient operation and safety of buildings.

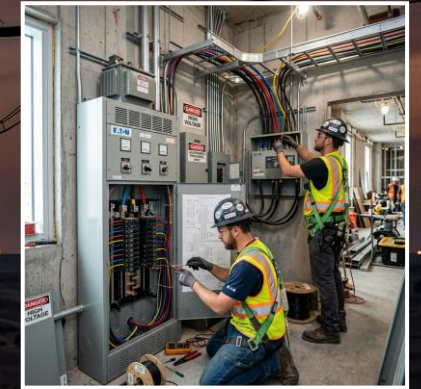

## CABLE LAYING WORKS

Installation and routing of electrical or communication cables, typically underground to connect power across various locations.

## EQUIPMENT SHIFTING WORKS

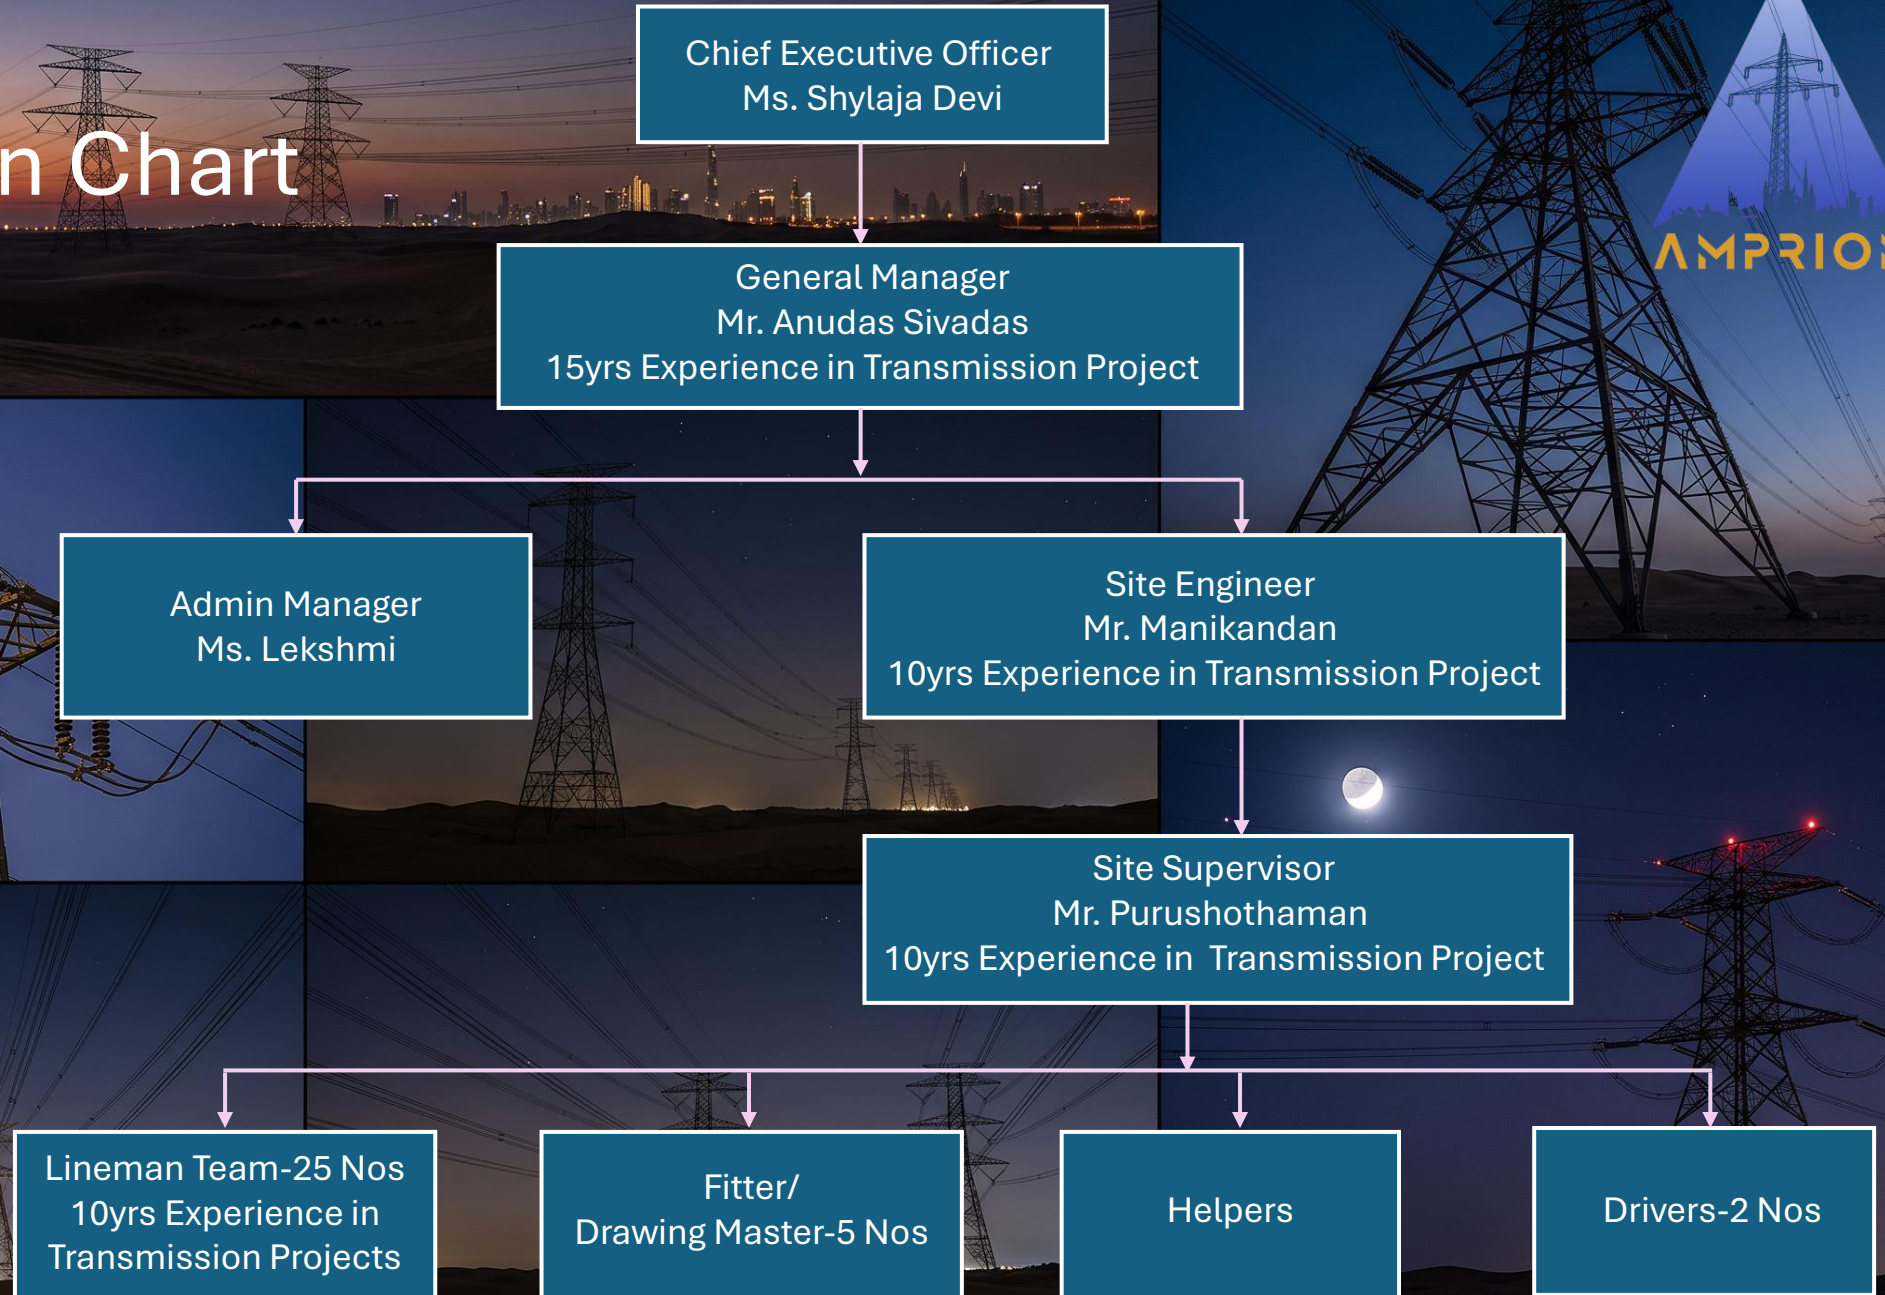

Careful relocation of machinery or equipment from one place to another, often requiring specialized tools and handling to ensure safety and operational integrity.

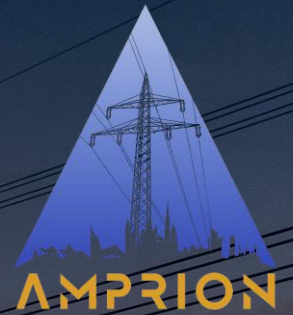

## ELECTRICAL EQUIPMENT INSTALLATION WORKS

Setting up and connecting electrical devices or systems according to technical specifications and safety standards to ensure proper functionality and compliance.
